

Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 10, 2007

Water Body Under Evaluation:

Water Body ID #: 0319
Name: Wilkerson Creek (Class C)
Length of Segment: 6.2 miles
County(ies): Clay

Use Attainability Analysis (UAA) Study:

UAA ID #: 0067
Submitter: BWR
Date(s) Conducted: May 24, 2007 and June 21, 2007
Date Received: July 31, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in May and June 2007 and no WBCR was observed. Two separate interviews did not reveal that WBCR occurred. However, this stream flows through a state park and there is evidence of secondary contact recreation (boating access) at Site 3.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion at all of the 3 sites evaluated. Due to meeting the maximum depth criterion, the committee recommends the WBCR use designation be assigned. Due to the evidence of secondary contact (boating access) and close proximity to Smithville Lake, Secondary Contact Recreation is recommended to be assigned.

Committee Recommendation:

☒ Add Use ☐ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
